Salmonella is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy persons infected with Salmonella often experience fever, diarrhea (which may be bloody), nausea, vomiting and abdominal pain. In rare circumstances, infection with Salmonella can result in the organism getting into the bloodstream and producing more severe illnesses such as arterial infections (i.e., infected aneurysms), endocarditis and arthritis. For more information on Salmonella, please visit the Centers for Disease Control and Prevention's Web site at <http://www.cdc.gov/> or call **800-CDC-INFO (800-232-4636)**.

Consumers who have purchased the recalled products are urged to destroy them but retain the "Best By/Sell By" code found on the back of the package.
